

# about us

Xuron Corporation, headquartered in Saco, Maine USA, has been manufacturing quality, precision hand tools for over 40 years. In 1989, Xuron Corp. introduced its Track Cutter (#2175B) to the model hobby world and ever since has been supporting the model hobby, craft and jewelry making markets with a range of products designed to provide excellent results and value.

Our dedicated and talented team of craftsmen/women produce thousands of tools every month.

Before shipping, each tool is hand finished and inspected. We take these extra steps because we recognize that the quality of the tools you use reflects upon the quality of your finished product.

At Xuron Corporation, we are strongly committed to manufacturing high quality products that offer exceptional value and reflect the strong reputation of our brand. We pledge to maintain a high standard of customer service and to treat our customers with respect and appreciation.

We are active members of both the Hobby Manufacturer's Association as well as the Craft & Hobby Association and we regularly participate in industry events.
